Local Intranet Zone Settings (Single Sign-On)

This document describes the Local Intranet Zone settings for Single Sign-On (hereafter, "SSO") of PMS.

* For each GC, replace "CORP" with the name of each GC domain.

In order to use the SSO function, Browser (Internet Explorer) security settings are required.

On the computer connected to the environment in the JGC LAN, if the domain of the client PC is set to the Corp domain, this security setting is done automatically.

As a precaution, please check the setting status before use.

The security settings to be implemented are as follows:

(1) [Start] button -> [Control Panel] and open [Internet Options].

(2) Select [Local Intranet] from [Security] tab and press [Sites] button.

Internet Options			?	\times	
General Security Privacy Conter	t Connections	Programs	Advanced		
Select a zone to view or change	security settings				
Internet Local intranet	Trusted sites	Restricted s	sites		
Local intranet			Sites		
This zone is for all wel found on your intranet			Sites		
Security level for this zone					
Custom Custom settings. - To change the settings, click Custom level. - To use the recommended settings, click Default level.					
Enable Protected Mode (requires restarting Internet Explorer)					
	Custom level.	D	efault level		
Reset all zones to default level					
	ОК	Cancel	A	pply	

(3) Click [Advanced] button.

Local ir	ntranet	\times
